

Best Practice-1

1. Title of the Practice: Road Safety Programme

2. Goals:

- * To know traffic rules
- * To create awareness among students about road safety.

3. The Context:

Road safety is a very crucial issue. The preventive measures to stop road accidents caused by rash driving need to be addressed as it is the necessity of the present times. Many times accidents take place due to rash driving and violation of traffic rules. Therefore, the college has taken a special initiative to conduct a programme on Road Safety.

1. Practice:

The college interacted with the traffic authorities and a special road safety programme was organized in the college with the help of traffic unit of Ghodegaon police station and highway traffic police, Alephata, on 17 February 2021. API Mr. Pradeep Pawar, and traffic authorities Sanjay Sutname, Lahu Shingade, Sampat Kaygude were present. The traffic authorities guided the students about road safety by giving different examples. The college students were given information about the online and offline driving license procedures. All the students were strictly warned not to violate the traffic rules. Moreover, students were informed not to drive vehicles without a driving license. The RTO speed detection system was demonstrated to the students with the help of RTO van. The students were given information about the app of the traffic control which is used to fine the drivers for violating the traffic rules. This programme helped the students to know about various traffic rules and systems of RTO.

5. Evidence of success: This programme helped the students to know the functionalities of RTO. The students asked different questions and RTO authorities answered all the questions satisfactory by giving suitable examples. Many students come to know how to pay the RTO fine online. Moreover, they come to know the license procedure and required documents.

6. Problems encountered: The College conducted the Road Safety programmes very effectively but the attendance of the students was not up to the mark. It may be due to the CORONA.

7. Resources required: Availability of RTO authorities.

Best Practice-2

1. Title of the Practice: Agreement of college with Forest Department for allocating land for Tree plantation and preservation.

2. Goals: *Create environmental awareness
*Tree plantation and its augmentation

3. Context: Environmental protection has become a very challenging issue worldwide. The government is taking positive steps for environmental protection. The tree plantation and its preservation can help us to protect our earth. Tree plantation and its appropriate augmentation are required to keep the villages green. The forest department is taking efforts for the tree plantation but preservation of plants needs attention.

4. Practice: B.D.Kale Mahavidyalaya, Ghodegaon, has taken a very crucial step by having agreement with the forest department for the allocation of 2 hector land to the college for the tree plantation and its preservation. The forest department has given a positive response to the college by forwarding the letter to higher authorities of forest department for their approval.

5. Evidence of success: The forest department has given consent to the college by sanctioning 2 hector land of forest near the college for the tree plantation and its preservation. The NSS students of the college successfully planted trees in the allocated location. Even the students have watered the plants and cleaned the campus by visiting the apportioned site.

6. Problems encountered: The sight allocated to the college by the forest department for tree plantation is 3 km. The NSS students find it difficult to walk the distance on both sides. It has created a challenge for the students to visit the site frequently

7. Resources required: The financial provision for transportation is required. The college has spent some amount from NSS funding for taking the students to the allocated site of the forest department for tree plantation.
