Programme Outcomes (PSO): B.A. Economics:- (2013 Pattern)

PSO1:- Understanding of a Developing Economy

Apply concepts of development economics to analyze issues of population growth, poverty, unemployment, agriculture, industry, labour, planning, and the regional economy (with special reference to Maharashtra).

PSO2:- Microeconomic Analysis

Demonstrate the ability to apply microeconomic tools—demand and supply analysis, production theory, market structures, factor pricing, and welfare economics—for solving real-life consumer and producer problems.

PSO3:- Macroeconomic Applications

Interpret and evaluate macroeconomic indicators such as national income, employment, consumption, investment, value of money, inflation, business cycles, and policies affecting overall economic performance.

PSO4:- Knowledge of Banking and Financial Systems

Analyze the evolution, principles, and functions of commercial banks, cooperative banks, and the Reserve Bank of India, including modern technologies in banking, operations of accounts, and financial instruments.

PSO5:- International Economics Competence

Apply theories of international trade, balance of payments, exchange rate mechanisms, and trade policies to evaluate India's foreign trade, export promotion measures, and participation in regional/global economic cooperation.

PSO6:- Public Finance and Fiscal Policy Skills

Evaluate public expenditure, taxation, revenue systems, budgeting (including deficit budgets), public debt, fiscal policies, and the financial relations between the Centre and States.

PSO7: Economic Development and Planning Abilities

critically examine theories, approaches, and constraints of economic development; assess the role of foreign capital, macroeconomic policy, and economic planning in promoting growth in developing countries.

PSO8:- Policy Evaluation and Problem Solving

develop the ability to analyze and propose solutions to major economic problems like unemployment, inflation, poverty, and deficits through the application of economic theory and policy tools.

PSO9:- Research and Quantitative Skills

Collect, organize, and interpret economic data related to population, agriculture, industry, labour, trade, and finance using basic statistical and analytical methods for research and policy-making.

PSO10:- Career and Higher Studies Readiness

Build a strong foundation in economic concepts and applied areas to prepare for competitive examinations, higher studies (postgraduate and professional courses), and careers in academics, research, banking, administration, and policy-making.
